17		Position of the rider			
18		Effective and Efficient use of aids			
19		Quality of Contact; Impulse; Connection of Movement			
20		Stabilization of Horse*			

This test is to be ridden on light contact. The horse should move forward freely with impulse and soft acceptance of the bit. * Stabilization of the horse is achieved when the horse's performance and overall presence is calm, cooperative, balanced, and appears independent of the rider's aids.
